## Lesson 4 Reteach

## Surface Area of Prisms

The sum of the areas of all the surfaces, or faces, of a three-dimensional shape is the surface area. The surface area S.A. of a rectangular prism with length $\ell$, width $w$, and height $h$ is the sum of the areas of its faces.

$$
S . A .=2 l w+2 l h+2 w h
$$

## Example

Find the surface area of the rectangular prism.

## Faces

top and bottom
front and back
two sides
sum of the areas

## Area

$2(4 \cdot 3)=24$
$2(4 \cdot 2)=16$
$2(2 \cdot 3)=12$
$24+16+12=52$

Alternatively, replace $\ell$ with $4, w$ with 3 , and $h$ with 2 in the formula for surface area.
S. $A .=2 \ell w+2 \ell h+2 w h$

$$
\begin{aligned}
& =2(4 \cdot 3)+2(4 \cdot 2)+2(3 \cdot 2) \\
& =24+16+12 \\
& =52
\end{aligned}
$$

So, the surface area of the rectangular prism is 52 square meters.

## Exercises

Find the surface area of each prism.
1.

2.

3.

4.
