

Salt Dough

Materials:

- 1 cup of salt
- 2 cups of flour
- $\frac{3}{4}$ cup of water
- Large bowl
- Spoon
- Food coloring (optional)

Instructions:

In a bowl, add the salt and flour and stir. Slowly add the $\frac{3}{4}$ cup of water and several drops of food coloring. Mix. You may need to add additional water if the flour/salt is not moist enough (be careful—too much will make the dough very sticky).

Activity Ideas:

- Create models with the salt dough. Leave the finished product out to dry! You can paint the salt dough once it's dry.
- Use the salt dough like playdough. Keep the salt dough in a plastic baggie or container so you can re-use!
