

Vocabulary #4a
Inherited Traits and Learned Behaviors
Week One

<p>Inherited traits</p>	<p>Characteristics passed down from parents to offspring.</p>		<p>I have inherited the traits of tongue rolling and brown eyes from my parents.</p>
<p>Instinctive behaviors</p>	<p>Behaviors that are inherited</p>		<p>An instinctive behavior that all deer seem to have is to run when frightened.</p>
<p>Learned behaviors</p>	<p>Behaviors that an animal develops by observing other animals or by being taught.</p>		<p>Learned behaviors can allow a raccoon to open a trash can.</p>

Vocabulary #4a
Inherited Traits and Learned Behaviors
Week One

Offspring	Children		The dog's offspring look a lot like the mother.
Perish	Die		A good rancher will not allow any of his cattle to perish.
Reproduce	To make offspring.		If plants did not reproduce, we would soon run out of food.
