

Domino Drill

You need: set of dominoes, a partner

Place the dominoes face up on the table.

- Player 1 secretly chooses a domino and states a sentence with a missing addend that matches the domino.
(Example: Player 1 chooses the 4/5 domino and says "Four plus some number equals nine.")
- Player 2 finds and keeps the domino that matches the sentence.
- Switch roles and play until the dominoes are gone.
- The WINNER has the most dominoes at the end of the game.
