

Go Fish

ACE = 1

You need: playing cards Ace-9, two or more players

1. Decide on a SUM. All players will try to get their cards to add up to this sum.
2. The dealer shuffles the cards and deals six cards to each player. The rest of the cards go face-down in the center.
3. The player to the left of the dealer is Player 1. Player 1 asks any other player for a card that will go with a card in his or her hand to add up to the chosen sum. The person asked must give up the card if he or she has it. If the player asked does not have the card, Player 1 draws a card from the pile.
4. Cards that equal the chosen sum are placed face-up on the table.
5. Players take turns until one player has used all cards in his or her hand. This player WINS and gets to be the dealer for the next game.
