

Guess My Rule

You need: a partner, paper/pencil

- Player 1 makes up a *secret* addition or subtraction rule (such as +3).
- Player 2 tells Player 1 a number and Player 1 uses the secret rule to tell Player 2 what the new number is.

Example:

- Player Two says 3, Player One says 6.
 - Player Two says 5, Player One says 8.
 - Player Two says 2, Player One says 5.
- Player 2 records both numbers each time until s/he can guess the rule.
 - Switch roles and play again.
